ELSEVIER

Int. J. Production Economics 41 (1995) 445–446

international journal of
production
economics

Contents Volume 41

Vol. 41, Nos. 1–3

Modelling production opportunities – a historical overview
R.W. Grubbström 1
Innovative production structures – Precondition for a customer-oriented production management
H.-J. Bullinger, F. Fremerey and J. Fuhrberg-Baumann 15
Performance measurement and performance management
M.J. Lebas 23
Lean production
H.J. Warnecke and M. Hüser 37
Design for automated assembly of circular parts: An algorithm
L.L. Abdel-Malek 45
Variable priority dispatching rules: An analytical approach
A. Agliari, M. Diligenti and L. Zavanella 51
A multicriteria framework for inventory control
P.J. Agrell 59
A methodology for the vulnerability analysis of just-in-time production systems
V. Albino and A.C. Garavelli 71
Some cultural/geographical styles in quality strategies and quality costs (P.R. China versus Australia)
M. Barad 81
A method for the design of flexible assembly systems
M. Bellgran and C. Johansson 95
Unit load size as a function of the degree of overtaking
J. Bengtsson and M.I. Johansson 103
Case study of productivity and quality aspects in production technology transfer to China
P. Bruun 109
Design and performance of kitting and order picking systems
H. Brynzer and M.I. Johansson 115
A managerial perspective on aggregate planning
G. Buxey 127
Genetic neuro-scheduler: A new approach for job shop scheduling
C.H. Dagli and S. Sittisathanchai 135
Measure of manufacturing performance in advanced manufacturing systems
A.J. de Ron 147
Robotics in automated inspection
P. Hedenborn and G. Bolmsjo 161
SME financiers' qualitative evaluation criteria in development projects
L. Hyvärinen 167
Integrating computer aided quality assurance in flexible engineering and production processes
M. Innala and S. Torvinen 179
The development of an integration modelling method for manufacturing cell control systems
J.Q. Jin, I.T. Franks and M. Loftus 185
Batch-model assembly line balancing: A multiattribute decision making approach
M.A. Kabir and M.T. Tabucanon 193

Workplace design – General view and some special experiences
P. Kern, R. Breining and R. Eckert 203
Customer focused lean production development
K. Kosonen and P. Buhanist 211
Adaptive input control for job-shop type production systems with varying demands using inverse queueing network analysis
M. Kuroda and A. Kawada 217
Electricity from industrial waste heat using high-speed organic Rankine cycle (ORC)
J. Larjola 227
Buying behavior and product planning
T. Leinsdorff 237
Actions taken to prevent the propagation of disturbances in manufacturing systems
R.A. Lindau and K.R. Lumsden 241
Optimal replacement of a tool subject to random failure
V. Makis 249
Design and operational control of an AGV system
R.J. Mantel and H.R.A. Landeweerd 257
Concepts, practices and expectations of MRP, JIT and OPT in Finland and Japan
H. Matsuura, S. Kurosu and A. Lehtimäki 267
Application of calculus of variations to a continuous time aggregate production model
A. Molinder 273
The strategic grounding of competitive advantage – The case of Scania
C.-H. Nilsson and J. Dernroth 281
Corporate strategy and culture in a conversion process: Adjustment in defence industry
E. Nironen 297
Strategies for encouraging and managing technological innovation
C. O'Brien and S.J.E. Smith 303
Design maturity assessment for concurrent engineering co-ordination
C. O'Brien and S.J.E. Smith 311
Common order cycle system for multi-item inventory model with learning in ordering and transportation
S. Ogawa and H. Ohta 321
Activity-based costing and distribution logistics management
T. Prittilä and P. Hautaniemi 327
Manufacturing strategy and capital budgeting process
T. Prittilä and J. Sandström 335
Genetic algorithm for assembly line balancing
J. Rubinovitz and G. Levitin 349
Cover-Time-Planning, a method for calculation of material requirements
A. Segerstedt 355
Organizational changes related to advanced manufacturing technology in the production area
H. Sun and F. Gertsen 369
Designing customer oriented production planning system (COPPS)
T. Tamura and S. Fujita 377
Low costs and carbon dioxide emissions through efficient power production methods in Finland
R. Tarjanne 387
A production scheduling system in a hybrid flow shop
T. Uetake, H. Tsubone and M. Ohba 395
The influence of lead-time reductions on decisions and rules in the production planning process
J. Wedel and K. Lumsden 399
Sequencing problems in designing energy efficient production systems
W.T.M. Wolters, A.J.D. Lambert and J. Claus 405
Design of a decision support system for overseas plant location in the EC
S. Yurimoto and T. Masui 411
Quality by a step-by-step program in low scale industries
J. Zackrisson, M. Franzen, M. Melbin and H. Shanavaz 419
Use of simulation for planning of work organization in highly automated production systems – Two case studies
G. Zülch, M.-J. Heitz and H. Schindele 429
Diary of Events 437
